R410	The IE consist of top level data groups. Each top level data group has its own data group ACTION which attributes apply to the top level data group and its subsequent sub data groups. The sender of the IE will always (in case of Create, Update and Delete) send all values of the occurrence. The "Operation" attribute is used to indicate what action is applied to the occurrence in the IE. Its value can be: "C" (create) ,"U" (update), "D"(delete). The "Validity date" together with the attribute "Modification Subtype" allow the following mechanism; An occurrence becomes invalid as of the specified "Validity date" when the value of "Modification Subtype" is set to "0" (implies an implicit end date). An occurrence and all values of the attributes become valid as of the specified "Validity date" when the value of "Modification Subtype" is set to "1". The values of the attributes become applicable as of the "Validity date" when the value of "Modification Subtype" is set to "2" (this is when the value of the attribute(s) change).
	"C" (create) : The create operation is used to create a new occurrence of an entity; "U" (update): The update operation is used to change an existing occurrence. It can render an existing occurrence invalid or it can modify existing values of attribute(s) of an occurrence; "D" (delete): The delete operation is used to physically delete an occurrence. This operation must only be used when data has been created erroneously.
R411	The 'Operation' attribute is used to indicate what action is applied: 'C' (create), 'D' (delete). In case of "updates", the data group 'SYSTEM UNAVAILABILITY' to be updated will be first deleted and then (re)-created.
R422	This attribute refers to the content of Column 2 in the UN/LOCODE. Column 2 shows the names of the locations (city names) which have been accepted for inclusion in UN/LOCODE, in accordance with the provisions of Recommendation n° 16 (see Rule 460).
R425	The attribute "Season Code" is NOT used as a flag. It is possible to have up to 9 different "seasons" in a year, depending on a defined time period, which is completely covering the year-period.
R430	The "Day in the week (end)" must be equal or greater then the "Day in the week (begin)".
R445	The SENSITIVE GOODS CODE consists of two parts: the first part represents the HS6 six digit commodity code of the TARIC system, the second part represents the "Sensitive Goods Code" which is a two numeric digit code, to be defined by DG TAXUD. This two digit numeric "Sensitive Goods Code" is only used when the 6 digit HS6 code is not specific enough to identify the concerned goods (example: the codes "0405xx" and "2208xx" in the TARIC system cover both sensitive and non sensitive goods, or more than one sensitive good, and must be extended to 0405xx.01 and 2208xx.01 in order to uniquely identify the sensitive goods). These codes are used in the ""List of Goods which when transported give rise to an increase in the Flat-rate Guarantee" (see proper domain).
R456	For "Package Code" use the alphabetic two-digit UN-code going from "AE"= "aerosol" to "WB" = "Wickerbottle".
R460	This UN/LOCODE refers to the 3 digit alphabetical code of the second part of Column 1 in the UN/LOCODE - Code for Ports and other Locations . Column 1 shows in a first part the ISO 3166 alpha-2 Country Code, which is followed by a space and a 3-alpha code for the city (location) name: XX XXX. This combination is invariably identifying the "City Name". This UN/LOCODE city name is used as an attribute in the "CUSTOMS OFFICE LSD" entity.
R470	The IE15 allows the usage of commodity codes up to 8 digits (national), however only the first six digits are sent to destination with the AAR (international) and to the Office(s) of Transit with the ATR (international).
R486	This attribute can be used to indicate potential specific characteristics of the Customs Office, namely regarding variation of opening hours (e.g. during public holidays, etc.), operational and/or procedural restrictions (e.g. competent only for simplified procedures, competent only for certain goods, the only office authorised to accept flat-rate guarantees, etc.). This attribute will be coded by DG TAXUD after clear definition of the need of the NAs.
R489	Reference Number Main Office is used to indicate the Customs Office (local) to which the Customs Office in question is subordinate. The use of this attribute is left up to the NAs.
R490	Reference Number Higher Authority is used to indicate that the Customs Office in question has a higher authority. As a consequence this attribute becomes required when the Office in question has a higher authority.
R495	Reference Number Take-over is used to indicate another Customs Office that replaces (take-over) the Customs Office in question when the latter is no longer able to perform NCTS operations.
R500	At least 1 of the 4 attributes must be present.
R501	Only corresponding values which are carried over from a previous message may be used.
R605	For an international IE38 / IE538 the values of this attribute must be amongst those defined by the common domain (see IE32, data group TRANSIT OPERATION STATE TYPE / EXPORT OPERATION STATE TYPE).
R660	The time has to be given in the format YYYYMMDDHHMM where: YYYY = Year MM = Month DD = Day HH = Hour MM = Minute
R700	This information is not required when goods of different type covered by the same declaration are packed together in such a way that it is impossible to determine the gross mass of each type of goods.
R804	The data group 'TRADER Consignor' must be used if it is different from the data group 'PERSON Lodging the summary declaration'.
R819	Only those occurrences of the data group shall be included in the message for which the last digit of the attribute 'Risk Analysis result code' has one of the following values: 'D', 'E', 'Z'.
R824	The 'Item Number (box 32) involved' shall be indicated if the risk analysis result relates to an item of an Entry summary declaration (ICS), Exit summary declaration or Export declaration (ECS) or Transit declaration (NCTS). In any other case the attribute 'Item Number (box 32) involved' shall not be used.
R830	The attribute cannot be used if the value of the attribute 'Procedure requested' is 76 or 77.
R831	If the value of the attribute 'Procedure requested (box 37.1)' is 76 or 77 or if value of the attribute 'Previous procedure (box 37.1)' is 71 or 78, the attribute 'Identity at departure' can not be used.

R838   The attribute is required where the attribute COMMODITY CODE.TARIC first additional code or COMMODITY CODE.TARIC second additional code contain an agricultural (refund) code, and where the attribute 'Procedure requested (box 37.1)' contains the codes 10, 11 or 23, and where the first digit of the attribute 'Inland mode of transport (box 26)' is other than '5' or '7'.
Note: The legislation does not exclude the modes of transport '5' and '7', but it is logical to exclude them since the identity of means of transport in case of post is not known when the declaration is lodged; and it does not exist in case of fixed transport installations.

R839   The 'Specific circumstance indicator' with value 'E' (AEO) can be used only if the 'Person lodging the exit summary declaration' and all 'Consignors' declared in the exit summary declaration/ 'Declarant' and all 'Exporters' declared in the export declaration have a valid AEO certificate of type 'AEOF' or 'AEOS'.

R840   If the Trader has a valid EORI Trader Identification number (EORI-TIN) or "a third country unique identification number (TCUIN) which has been made available to the Union by the third country concerned ", then the EORI-TIN or TCUIN shall be declared. Other than EORI-TIN or TCUIN shall not be used, otherwise the declaration will be rejected.

R852   The attribute 'Transit' is set to '1' (yes), if a transit procedure is issued after Export (the Export operation is – from a fiscal viewpoint- to be considered as 'exited'). In this cases the issued transit document (MRN) must be indicated in the Data group 'Produced Documents/Certificates'. In any other case the attribute 'Transit' is set to '0' (no).

R853   The amendment request must be sent to the Member State where the Office of Exit (declared in the initial version of the Exit summary declaration) is located.

R854   The amendment request must be sent to the Member State where the Office of Export (declared in the initial version of the Export declaration) is located.

R856   No amendment allowed for 'PERSON lodging the summary declaration'.

R857   The data group 'TRADER Representative' can be used by the 'PERSON Lodging the Exit summary declaration' to authorise a Representative amending an Exit summary declaration on his behalf at the Office of Exit concerned.

R858   Nationally defined values shall not be transmitted to the office of exit.

R861   Either 'Trader Exporter' or 'Trader Declarant' must be used.

R862   No amendment allowed for 'Trader Declarant'.

R863   Either 'MRN' or 'Manifest Number' must be used.

R865   Either 'Exit date' or 'Exit stopped date' must be used. If the 'control result code' is 'B1', then the 'Date exit stopped' must be used, in any other case the 'Exit date' must be used.

R867   Within the data group at least one of the attribute to which Rule 867 applies is to be used.

R868   The content of this attribute is always set to '00'.

R869   Where TARIC doesn't demand for this additional code the content of this attribute is set to '0000'.

R870   When the exit summary declaration amendment is submitted by the Trader Representative, the data group 'TRADER Representative' becomes required'.

R871   This attribute becomes required for agricultural products with export refunds, i.e. where the first digit of the attribute 'Community / National Procedure (box 37.2)' is 'E'.

R873   This attribute becomes required when the 'Statistical value amount (box 46)' is expressed in a currency other than the national one.

R874   This attribute becomes required when the 'Total amount invoiced' (box 22.1)' is expressed in a currency other than the national one.

R875   The attribute 'Item Number' refers to corresponding 'Item number' of the E_EXS_DAT (IE 615)/E_ENS_DAT (IE315) /E_EXP_DAT (IE515)/ E_DEC_DAT (IE15).

R876   If the same 'Commercial reference number' is declared for all goods items, the attribute 'Commercial reference number' (box 7) on HEADER level is used. The attribute 'Commercial reference number' (ex box 7) on GOODS ITEM level can not be used.

R877   The data group can be used to add routing information, other than the 'Country of Export' (box15/15a) and 'Destination country' (box17/17a).

R879   Exit: The country of final destination must be entered in any case. If the specific circumstance indicator is not equal to 'A', then at least the country of original departure must be entered additionally.
Entry: The country of original departure must be entered in any case. If the specific circumstance indicator is not equal to 'A', then at least the country of final destination must be entered additionally.

R880   The attribute 'Location Of Goods (box 30)' / 'Location Code (box 30)' and 'Customs sub place (box 30)' can not be used at the same time.

R881   If the attribute is used, its minimum length is 4 digits.

R887   The 'Item number'/''Arrival item number'/'Pre-arrival item number' is the sequential number of the listed items in this message. It must be unique throughout the declaration.

R893   Rule for the purpose of EMCS:
Only 1 occurence of the value 'AAD' for the attribute 'Previous Document Type' can be used per goods item.
The attribute 'Previous Document Reference' for 'Previous Document Type' with value 'AAD' shall be the AAD Reference Code (ARC-21 characters) concatenated with 3 positions for the Body Record Unique Reference (3 characters, left padded with zeroes).
IF 'PREVIOUS ADMINISTRATIVE REFERENCES.Previous Document Type' ='FAD',

AND (the value declared in the attribute 'PREVIOUS ADMINISTRATIVE REFERENCES.Previous Document Reference' must be unique; i.e. if the same value is re-used in another valid Export declaration, this declaration will be rejected)]
ELSE (the message is rejected with IE906 – Rejection reason: violation of R893)].

TR0002   The Control Message (IE17/IE18/IE44/IE51/IE517/IE518) always reports back the following fields at the HEADER level only if they are available in the relevant declaration message (IE15/IE515 {IE01/IE501 or IE03/IE503}/IE43 respectively):
- Identity of means of transport at departure (exp/trans)
- Nationality of means of transport at departure
- Total number of packages
- Total gross mass
- Specific Circumstance Indicator
- Transport Charges – Method of Payment
- Commercial Reference Number
These fields are returned for the information of Customs Officers at Departure and are NOT verified on receipt against the original values."

TR0003   If errors are found at the HEADER level, then RoC-Control Indicator is set to:
    - DI (DIfferent values found) or
    - OT (any OTher things to report)
If errors are found at the level of GI then GI-RoC-Control Indicator can be set to:
    - OR (ORiginal values of the Goods item),
    - DI (DIfferences in values for a Goods Item),
    - NE (values of a New Goods item) – this value will not occur in the ECS domain,
    - NP (Not Presented document) or
    - OT (OTher)

TR0004   The 'Results of Control' group at the MESSAGE level is repeated for each of the differences found in the data items at the HEADER level. The concerned data items, if present, are:
    - Identity of means of transport at departure (exp/trans)
    - Nationality of means of transport at departure
    - Total number of items
    - Total number of packages
    - Total gross mass
    - Transport charges - Method of Payment
    - Commercial Reference Number

TR0005   When the RoC-Control Indicator is equal to DI, this data item is Required.
When the RoC-Control Indicator is equal to OT, this data item cannot be used.

TR0006   When the RoC-Control Indicator is equal to OT, this data item is Required.
When the RoC-Control Indicator is equal to DI, this data item is Optional.

TR0007   The GI data group is Required only when discrepancies have been found in one or more GI or when a new goods item has been found during the control.

TR0008   This data group shall be used in the following cases:
- when the Control Indicator in the accompanying RoC-group is equal to 'DI' or 'NE', the group will list the information found, if available. For the case where the goods item is missing, the goods item is filled in as TR0011 suggests.
- when the Control Indicator in the accompanying RoC-group is equal to 'OR', the group will list the information received with the declaration, if present.

TR0009   This data item is Required only when the value of the accompanying Control Indicator is equal to OT. For other values of the Control Indicator, it is Optional.

TR0010   This data item is Required when the accompanying Control Indicator is equal to NP. In all other cases, this data item must not be used.

TR0011   (Unsatisfactory -> Discrepancies at the level of a GI are found – Control Indicator=DI).
One or two GI groups are specified: One for the Original GI (GI-OR), and optionally another one for the Found GI (GI-DI).
    - GI-OR specifies all the data-groups and data-items present in Goods item of the original IE001/IE501 and also includes a RoC - Control Indicator with the value OR.
    - GI-DI specifies the information for the goods item as found.
It contains at least the RoC - Control Indicator with the value DI.
Eventually, other Results of Control groups with value NP can be added, specifying not presented documents.
Additionally, RoC OT can be added to GI-OR and/or GI-DI groups, specifying any other things to report on the goods item.
A missing Goods Item should be treated like a discrepancy.
The found 'Goods Item' group should then be empty apart from the 'Item number' field and the 'RoC' groups.

TR0012   (Unsatisfactory -> Missing document – Control Indicator=NP)
For each document missing, a RoC-group with Control Indicator=NP will be added.

TR0014   (Unsatisfactory -> Document Not Presented - Control Indicator=NP)
GI - RoC - Control Indicator is set to NP. The Pointer to the attribute contains a reference to the missing document in the format 44#n (n being the number of the document).

TR0018   The hash symbol ('#') is used to indicate the numbering of subdivision or occurrence (i.e. 'box_number # subdivision/occurrence').

TR0019   The numbering of items:
    - In case of any difference being found in a Goods Item, the item numbering is equal to numbering defined in the declaration.
    - In case of a new Goods Item, the item number is equal to the number of the last Goods Item in the declaration + 1.

TR0103   This field is to be validated against Codelist 13 (Document Type) if used in a Common Domain message.
This field is to be validated against the Document Type valid in the NA if used in an External Domain message.

TR0104   TR0104 Document/reference number is not needed for IE906 related to IE111, IE112, IE411, IE30, IE31, IE32, IE34, IE37, IE912, IE913, IE914, IE916, IE931, IE932, IE70, IE71, IE971 and also for IE302 and IE303 when no Document/Reference number is provided.
It must be present in IE906 related to all other messages.

TR0105   The value of the "Downtime FROM" in the MESSAGE - COUNTRY - SYSTEM UNAVAILABILITY Data Group must be within the time range ["Time FROM", "Time TO"] specified in the MESSAGE - COUNTRY - UNAVAILABILITY MATRIX Data Group.

TR0107   This time cannot be in the past.

TR0108   If specified, this date must be less or equal to the 'MESSAGE.Date of preparation' of this message and must not be less than the 'HEADER.Issuing date' of the IE501/IE503 for this movement. A tolerance of one (1) day will be applied to take into account that the NECAs' system times may diverge due to different time zones, daylight savings time (DST) schemes, and non-synchronous clocks.

TR0200   This data group or item is Required when NTA/NECA sends AAR/AER/ATR/EXS in response to the request; otherwise not used.

TR0201   This data group or item is Optional/Dependent when NTA/NECA/NICA sends AAR/AER/ATR/EXS/ENS in response to the request; otherwise not used.

TR0202   This data item is Required when NTA/NECA/NICA does not send AAR/AER/ATR/EXS/ENS in response to the request; otherwise not used.

TR0203   This data item is Optional/Dependent when NTA/NECA/NICA does not send AAR/AER/ATR/EXS/ENS in response to the request; otherwise not used.

TR0217   When Customs can agree with the request for an AER, the complete C_AER_SND is sent to Office of Exit.
When they disagree, only the MRN, the AER rejection reason code, the CUSTOMS OFFICE of Export (only if the rejection reason code is other than "3") and the AER rejection reason (mandatory if the rejection reason code is "4", otherwise optionally) are sent to Exit.

TR0218   When Customs can agree with the request for an EXS the complete C_EXS_SND is sent to exit. When they disagree only the MRN, the Summary Declaration rejection reason code, the CUSTOMS OFFICE of Lodgement (only if the rejection reason code is other than "3") and the Summary Declaration rejection reason (mandatory if the rejection reason code is "4", otherwise optionally) are sent to Exit.

TR0403   The maximum time period covered by the seasons is one year. There must be no overlap of seasons, meaning that the starting day of one season must be after the finishing day of any previous season.

TR0554   The Condition "C554" should be checked only for the goods items with the RoC Control Indicator 'DI' but not missing (see TR0011 for the definition of a missing item).

TR0700   Values of field 'type' must be identical throughout the message (i.e.: same value in all the repetitions of the "System Unavailability" group).

TR0702   Note that the IE71 is a replica of the IE70 and so the same conditions and rules can be applied. In case of unscheduled unavailability the 'down time to' of the IE70 is optional.
For the purpose of consolidation, IE70 with Type 'U' or 'N' that have no value for 'downtime to' are considered as being ongoing. This means that when a IE70 is received by the system with an empty 'down time to'-field, the timer will keep on running until a new IE70 is received containing a filled in 'down time to'-field.

TR0703   Within a single "SYSTEM UNAVAILABILITY" data-group, the "Downtime from" must be prior to the "Downtime to".

TR0704   The conjunction of the following data items uniquely identifies a system unavailability:
- COUNTRY.Country code
- SYSTEM UNAVAILABILITY.Business functionality
- SYSTEM UNAVAILABILITY.Downtime from
- SYSTEM UNAVAILABILITY.Type

TR0901   Only the 'Error' data item attached to the level at which the error has been detected, will be used in the CONTRL message.

TR0902   The data groups below the one indicating the error in the CONTRL message will not be used.

TR0903   When there is no error at INTERCHANGE (UNB or UNZ segment) or MESSAGE (UNH or UNT segment) level, the data items INTERCHANGE ERRORS.Interchange service segment and MESSAGE ERRORS.Message service segment should not be used.

TR0904   The only offices included are those Transit Offices and/or Office of Destination, that are in the NA producing the acknowledgement.

TR0911   The pointer in 'RESULTS OF CONTROL' refers to the box number of the Export Accompanying Documents/Transit Accompanying Documents of a particular data item. Where the data item is a further subdivision or if a particular occurrence of a document needs to be identified, this is denoted by : 'box_number' # 'subdivision/occurrence'.

TR1002   This data group is applicable to NCTS Phase 4 only.
